

Your Garden Podcast

Listen while you dig.

Personalized audio growing guides built for your location, your plants, your soil. Not generic YouTube advice.

Loved by beta testers

"This changed how I garden."

How It Works

1

Tell Us About Your Garden

Your location, zone, soil type. We'll ask the right questions.

2

We Build Your Episodes

Personalized to your hardiness zone, frost dates, and soil conditions.

3

Listen While You Dig

Expert advice in your ear, exactly when you need it.

What Makes It Different

Zone-Specific

We know your frost dates, first bloom, and last freeze. Not some generic advice for "the north."

Soil-Aware

Clay, loam, sandy, rocky. We adjust recommendations based on what you're actually working with.

Expert Sources

Every episode is built from university extension research, not random internet opinions.

Two Ways to Learn

Quick

~5 minutes

Essentials only. Plant it, water it, wait. Perfect for the morning commute or a quick refresher.

Full Masterclass

30–60 minutes

Go deep. Learn the why behind every step. Varieties, timing, harvest secrets, storage.

"I learned more about tomatoes in 40 minutes than I did watching 5 hours of YouTube." — Zone 5b, Milton WI

46 Crops and Growing

From common favorites to heirloom treasures.
